Full Stack Developer with experience in building scalable web applications using MERN, NestJS, and Next.js. Proficient in backend architecture, authentication, RESTful APIs, and database optimization with PostgreSQL and MongoDB.

SKILLS SUMMARY

- **Languages**: Typescript, Java (DSA), Python, C
- **Frameworks & Libraries**: React.js, Next.js, Node.js, NestJS, Express.js, Prisma, Recoil, Bootstrap, Tailwind CSS
- **Database**: MySQL, PostgreSQL, MongoDB
- **DevOps & Tools**: Docker, TurboRepo, MonoRepo, NPM, Vite, Git, Vercel, Postman

WORK EXPERIENCE

Jr. Full Stack Developer | Hubblehox - Mumbai   **Mar 2025 - Present**

- Built and maintained scalable backend services using **NestJS**, improving API performance and reducing response times by **30%** through optimized request handling and modular architecture.
- Developed a library of **10+ reusable UI components** with **Next.js** and **Tailwind CSS**, reducing frontend development time and ensuring consistent design across the application.
- Implemented efficient **MongoDB** query optimization and **pagination strategies**, enabling smooth data handling and improving performance on large datasets by **25%**.

Associate Software Trainee | TCS - Gandhinagar   **Sep 2024 - Mar 2025**

- Led backend development using **Node.js** and **Express.js**, delivering secure and well-documented **RESTful APIs** that improved cross-team collaboration and reduced integration issues.
- Implemented **JWT-based authentication** and **role-based access control**, enhancing application security and protecting sensitive user data.
- Collaborated with cross-functional teams, including designers, testers, and project managers, to deliver user-friendly features aligned with business requirements and technical standards.

Jr. Full Stack Intern | Anomaly Enterprise | Certificate   **Dec 2023 - May 2024**

- Developed a responsive website using **Bootstrap**, **PHP**, and **MySQL**, improving UI performance and user experience.
- Built and documented secure **REST APIs** with **Node.js** and **Express.js**, optimizing client-server interactions.
- Integrated **JWT authentication** and custom **middleware** for validation, error handling, and access control.

React Developer Intern | TatvaSoft | Certificate   **May 2023 - June 2023**

- Developed a full-stack book-selling platform using the **MERN stack**, enabling users to register, log in, and manage book listings.
- Implemented **user authentication and account management** with JWT and bcrypt, ensuring secure and seamless interactions.
- Built responsive frontend components using **React.js, Axios, and Formik**, delivering a smooth and responsive UI.

CERTIFICATIONS

Full Stack Developer Program | 100xDevs | Certificate   **Dec 2023 - July 2024**

PROJECTS

Tech-Log | Live | GitHub

- This project is a clone of Medium | X like platform. The application allows users to read, write, and interact with articles, similar to Medium. Users can also manage their profiles.
- The project is divided into three main components: Backend, Frontend, and Common modules for shared utilities with proper authorization and authentication.
- **Technologies**: React.js, Node.js, Hono, Cloudflare Workers, PostgreSQL, Prisma, JWT, Crypto, Axios, Vite, Vercel

Stock Market Screener | During 7th SEM | link

- Collected and analyzed a minimum of one year's historical data for NSE and BSE stocks, implementing sorting algorithms to prioritize stocks based on custom strategies.
- Built a **Python simulation tool** to identify potential long or short stock positions, helping make more informed and strategic investment decisions.
- **Technologies**: Python, Numpy, Pandas

EDUCATION

Bachelor in Computer Engineering from **G.H. Patel College of Engineering & Technology**   CGPA: 7.8
Diploma in computer Science from **Tolani Foundation, Gandhidham Polytechnic**   CGPA: 9.27
